## IMPROVING PATIENT OUTCOMES BY IDENTIFYING AND ADDRESSING SOCIAL NEEDS

Social determinants influence health in very direct ways. A patient's housing, food, and safety needs can create barriers blocking quality care and can contribute to poor health.

Wellcare wants to partner with you to address social determinants of health. Together, we can identify and address social barriers and improve the health of our members.

### How can these needs be identified?

You should include supplemental codes in the patient's diagnosis section on a claim form. Reporting SDOH codes allow physicians, hospitals, health systems, and payers to better track patient needs and identify solutions to improve health outcomes.
